

Statisticians/programmers at AstraZeneca

Statistikkonsulterna Jostat & Mr Sample AB

Yrke : Statistiker/programmerare

Statisticians/programmers

Are you interested in becoming part of the statistics group at AstraZeneca R&D Mölndal. Statistikkonsulterna Jostat & Mr Sample AB are now looking for statisticians and programmers for assignments with start as soon as possible

The arena

Biometrics & Information Sciences (B&I) is the home of late stage drug development biometrics activity at AstraZeneca and consists of experts in statistics, programming, informatics and information science . B&I drive good design and standards to generate the data needed for quality decision making on AstraZeneca's drug development projects as well as ensuring high quality regulatory submissions.

The role

As a statistician or programmer in clinical development you will apply your technical skills to support all aspects of the clinical development process. This includes but is not limited to the design, analysis and reporting of clinical studies as well as ensuring that our databases, reporting tools, documentation and submissions to regulatory authorities adhere to quality and standards requirements. Depending on your interest and experience, you might also be expected to contribute to more strategic planning and act as our clients expert in contact with their external providers and collaborators.

Requirements:

Good collaboration, communication and influencing skills

Good written and spoken English

Statisticians: Master degree in Statistics, preferable with a strong mathematical foundation

Programmers: Degree in Computer Science, Mathematics, Statistics, Informatics or related subject accompanied with documented programming skills.

Good but not required:

Experience from the pharmaceutical industry

Experience in using software's such as SAS and S-Plus/R.
Knowledge of CDISC standards (CDASH, SDTM, ADaM) and their application
Experience from working with databases
Documented experience from scientific work
Post graduate degree

Job type: Full time

Positions: 2-3

Deadline for applications: 2016-02-21 but since selection is done continuously we prefer receiving your application as soon as possible.
