Statistikkonsulterna are looking for a data engineer for project at our customer within the automotive industry.

Data engineer

Data comes from both in-house testing and real world engine usage. As data engineer, you are a person with knowledge and experience in setting up database structures from raw data, merging data from different sources, building advanced querying tools and general data driven production coding.

Responsibilities:

- Responsible for data maintenance in the data management group
- Set up hardware and software requirements for big data
- Connect multiple databases and servers
- Write complex queries for databases
- Improving data collection procedures
- Verifying the integrity of data used for analysis and developing automated deviation detection systems
- Collaborate with engine development project and virtual testing to understand company needs and devise possible solutions
- Keep up-to-date with latest technology trends

Required skills:

- Advanced coding/programming (e.g. Python, Hadoop, Spark, SQL, MongoDB, Elastic Search)
- Good understanding of databases, data handling, data structures, etc.
- Previous experience with setting up databases, writing queries, etc. for a new project
- Working with different file formats and database API's
- Great collaboration and communication skills and like to work in a team
- Interest/potential interest in data science/data analysis
- Knowledge of working in software oriented organizations

Statistikkonsulterna has since 24 years profiled in statistics and mathematics and now consists of 10 qualified statisticians and a large network of universities and colleges. Statistikkonsulterna is focusing on staff development through internal and external training and seminar and conference participations. Several of Statistikkonsulterna's employees are also active partners.

Statistikkonsulterna has framework agreement with Volvo companies, CEVT, Scania, AstraZeneca, IKEA of Sweden, Essity, Mölnlycke Health Care, TetraPak. Furthermore, we also perform research-related projects for universities, hospitals etc.

Statistikkonsulterna is SAS Silver Partner and an active member of Swedish Statistical Association and ESOMAR SFK.

Statistikkonsulterna has access to and experience in SAS / Base, SAS / Enterprise Guide, SPSS, R, and Minitab. Furthermore, we have expertise in programming and SQL.

More up to date information is available on our website: <http://www.statistikkonsulterna.se>

Interviews will be conducted continuously. Please apply as soon as possible, but not later than 31 Oktober 2018.
