Statistikkonsulterna Jostat & Mr Sample AB are now looking for a Biostatistician for assignments at AstraZeneca. Employer: Statistikkonsulterna Jostat & Mr Sample AB City: Göteborg.

Biostatistician

Are you interested in becoming part of the statistics group at AstraZeneca R&D Gothenburg? Would you like to join AstraZeneca's journey where your contributions will have profound impact? Here is a great opportunity for you! Quantitative Biology is now looking for a statistician or data scientist to start a consultant assignment as soon as possible.

AstraZeneca is a major international healthcare business engaged in the research, development, manufacture and marketing of prescription pharmaceuticals and the supply of healthcare services. AstraZeneca is proud to offer a unique workplace culture that inspires innovation and collaboration. Co-workers are empowered to express diverse perspectives - and are made to feel valued, energized and rewarded for their ideas and creativity.

As a statistician in preclinical development, you are expected to provide statistical expertise in the design, planning and evaluation of *in-vivo* and *in-vitro* studies and in assay development. This includes extensive interaction with scientists in other fields, building and internalizing appropriate algorithms and techniques, developing Shiny apps and expanding our knowledge and use of Bayesian techniques.

Required Background

Minimum MSc in Mathematical Statistics, Statistics, Biostatistics or similar subject with a strong focus on statistics.

Good knowledge of R

Good collaboration, communication and influencing skills.

Good written and spoken English.

Desired Additional Background or Skills

One or more of the following is an advantage:

Higher academic degree.
Experience from drug development or other related fields
Experience with Bayesian techniques
Experience with Shiny

Personal Qualities

We put high importance in personal qualities. Candidates should possess good social skills, be strong team player and be able to work effectively in a global organization where teams often are geographically dispersed. You should be able to work independently, take own initiatives and have a positive, goal oriented and problem solving attitude. It is essential to have good organizational and communication skills and you should be able to analyze and summarize your results and be comfortable in presenting them. A successful candidate has interest and ability to communicate statistical matters to other experts as well as interest in the application of statistical methodology in pharmaceutical development.

Statistikkonsulterna has since 24 years profiled in statistics and mathematics and now consists of 12 qualified statisticians and a large network of universities and colleges. Statistikkonsulterna is focusing on staff development through internal and external training and seminar and conference participations.
