Statistikkonsulterna Jostat & Mr Sample AB are now looking for a Statisticians for assignments at AstraZeneca. Employer: Statistikkonsulterna Jostat & Mr Sample AB City: Göteborg.

### **Statisticians, Late-Stage CVRM Biometrics, AstraZeneca Gothenburg**

AstraZeneca is a major international healthcare business engaged in the research, development, manufacture and marketing of prescription pharmaceuticals and the supply of healthcare services. AstraZeneca is proud to offer a unique workplace culture that inspires innovation and collaboration. Co-workers are empowered to express diverse perspectives - and are made to feel valued, energized and rewarded for their ideas and creativity

*Are you interested in becoming part of the group of statisticians at AstraZeneca R&D Gothenburg? Late-stage Cardiovascular, Renal and Metabolism Biometrics are now looking for Statisticians for on-site contractor assignments with start as soon as possible.*

You would join a team of statisticians and statistical programmers to provide statistical expertise to the design, planning, reporting, interpretation, documentation and regulatory submissions of our clinical development programs. This will also include work of exploratory nature, e.g. modeling and simulation, as well as other means to improve internal decision making. Dependent on your experience you might be expected to contribute to more strategic planning, quantitative decision making, act as expert contact to our external providers and collaborators and be part of the function's adaption and development of statistical methodology.

#### **Required Background**

- Minimum MSc in degree in relevant subject, such as Mathematical Statistics, Statistics or Biostatistics
- Good collaboration, communication and influencing skills
- Good written and spoken English

#### **Other Relevant Qualifications**

- Higher academic degree
- Expertise in at least one programming software such as SAS or R
- Experience from drug development or other related fields

## Personal Qualities

Candidates should possess good social skills, be strong team players and be able to work effectively in a global organization where teams often are geographically dispersed. They should be able to work independently, take own initiatives and have a positive, goal oriented and problem-solving attitude. It is essential to have good organizational and communication skills and you should be able to analyze and summarize your results and be comfortable in presenting them. Successful candidates will have an interest and ability to communicate statistical matters to other experts, as well as interest in the application of statistical methodology in pharmaceutical development.

*Statistikkonsulterna has since 25 years profiled in statistics and mathematics and now consists of 12 qualified statisticians and a large network of universities and colleges.
