Statistical Programmer, Early Biometrics & Statistical Innovation AstraZeneca

AstraZeneca is a major international healthcare business engaged in the research, development, manufacture and marketing of prescription pharmaceuticals and the supply of healthcare services. AstraZeneca is proud to offer a unique workplace culture that inspires innovation and collaboration. Individuals are empowered to express diverse perspectives - and are made to feel valued, energized and rewarded for their ideas and creativity

As a Statistical Programmer you would join a team of statistical programmers in early CVRM/RIA Biometrics and act as the main programmer of a Phase I-II trials.

Required Background

- Minimum educational level is a BSc degree in a relevant subject such as biostatistics, mathematics, computer science or life science.
- Minimum of 5 years SAS programming experience in the Pharma sector (CRO/industry).
- Expertise in CDISC standards (SDTM, ADaM), TLFs production and CRT packages.
- Good collaboration, communication, leadership and influencing skills
- Good written and spoken English

Additional background

- Experience in CVRM/RIA disease areas is desirable

Personal Qualities

Candidates should possess good social skills, be strong team players and be able to work effectively in a global organization where teams often are geographically dispersed. You should be able to work independently, take own initiatives and have a positive, goal oriented and problem-solving attitude.

It is essential to have good organizational and communication skills and you should be able to analyze and summarize your results and be comfortable in presenting them. Successful candidates will have the ability to communicate subject matter expertise to other experts, as well as an interest in the application of programming in pharmaceutical development.

Statistikkonsulterna has since 25 years profiled in statistics and mathematics and now consists of 12 qualified statisticians and a large network of universities and colleges. Statistikkonsulterna is focusing on staff development through internal and external training and seminar and conference participations.
